### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Suzannah Sundby on 4/12/10.

The application has been amended as follows:

These listings of claims 47, 49, and 51 will replace all prior versions, and listings, of claims 47, 49, and 51 in this application:

47. (new) The process for the preparation of a sol according to Claim ~~[[47]]~~ 46 where the ratio H<sub>2</sub>O/Me is from 2 to 3.

49. (new) The process for the preparation of a sol according to Claim ~~[[49]]~~ 48 where the reaction of hydrolyzing is in the presence of an aqueous solution of HCl.

51. (new) The process for the preparation of a sol according to Claim ~~[[51]]~~ 50 where the molar ratio of alkoxide to acid is preferably from 1/0.1 to 1/0.01.

### **OATH OR DECLARATION**

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

Art Unit: 1712

The oath or declaration is defective because:

It does not identify the foreign application for patent or inventor's certificate on which priority is claimed pursuant to 37 CFR 1.55, and any foreign application having a filing date before that of the application on which priority is claimed, by specifying the application number, country, day, month and year of its filing.

### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: The examiner had previously applied Kim in view of Minami and further in view of Ravaine as the closest prior art teaching the previously pending version of the claims. Applicant has amended the independent claims to both further limit the aprotic solvent, and to require that an equal volume of the aprotic solvent be added to replace the alcohol removed during hydrolysis for forming a sol, and prior to gelling. Such amendments are not taught by the cited prior art, and after further search and consideration, no additional more relevant prior art references directed to the claim amendments were found.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
